

Irma Sports August 2

On August 2, Irma will celebrate its annual recreation day, under the auspices of the Irma and district Board of Trade.

This day is to be set aside for the purpose of bringing the people of the district together.

Irma and district have reason to be proud of their town. The fine school that has been built is a credit to any community and a hotel that is recognized as the best and most modern hotel of its size in the province.

Now let's get together and make this day to be remembered. Those who live in town decorate your places of business and your homes, put up flags, and in general make our town as bright and gay as possible.

The various committees are working hard to make this day a success. The parade is to be the best yet. So come on Irma, let's show how nice we can look on our own favorite day.

Irma and District Board of Trade.

Wedding Bells

KASTEN SPRINGS

NORTH HATTEY, Que. — St. Barnabas Church at North Hattey was the scene of a very pretty wedding on Saturday afternoon, June 3, at three o'clock when Priscilla Ann, daughter of Mr. and Mrs. Ralph H. Springs of North Hattey, was united in marriage to Mr. Henry Ludwig Kasten of Edmonton, Alta., son of Mr. and Mrs. Robert Kasten of Edmonton, the Rev. Mark Beaufort officiating.

The wedding music was played by Mrs. Richard Spriggs, aunt of the bride, and Miss Imogene Kezar sang "Oh Perfect Love," during the signing of the register. White lilacs in profusion were used to decorate the church, the guest pews being marked with lily-of-the-valley, tied with satin ribbon.

The bride, given away by her father, wore a floor-length gown of white organza, fashioned with a fitted bodice having a high round neckline, long sleeves tapering to points over the hands and a full skirt. Her shoulder-length veil was held by a bandeau of pink and she carried a bouquet of pink sweetheart roses and lily-of-the-valley. Her only ornament was a three-strand necklace of pearls, a gift of the groom.

Miss Ruth Taylor, as bridesmaid, was gowned in blue net over tulle and she wore a bandeau of blue flowers in her hair and carried a Colonial bouquet of mauve sweet peas, pink carnations lily-of-the-valley.

Mr. John Springs, brother of the bride, acted as best man, and the ushers were Messrs. David LeBaron and Charles Voisard.

The bride's mother was in navy blue sheer, with a grey straw hat trimmed with blue flowers and she wore a corsage of pink roses. The groom's mother was attired in a rose crepe dress with matching accessories and her corsage was of Talisman roses.

The reception was held at the home of the bride which was adorned with white lilacs and yellow tulips. The bride's table was centred with a three tiered wedding cake flanked with pink candles in crystal holders and decorated with pink sweet peas and lily-of-the-valley.

Later the bridal couple left for the Saguenay trip, the bride travelling in a taupe suit with green accessories and wearing a corsage of yellow roses.

The bride is a graduate of the Sherbrooke Hospital School of Nursing.

Mr. and Mrs. Kasten will reside in Edmonton, Alberta.

CARD OF THANKS

Our heartfelt thanks to all for their sympathy and for cards, floral tributes and gifts given in memory of our dearly beloved wife and mother. Thanks to Rev. Foster, Mrs. Long and choir.

Special thanks to the N. L. Fuder and Floyd Fuder families who so generously gave their kind help in both word and deed.

—The Whitbeck Family.

Wedding Bells

ALLEN — FISHER

A quiet wedding took place on July 6 at 2:30 p.m. at Christ Church, Mannville, when Gwen-doline Emelny, elder daughter of Mr. and Mrs. Wm. Fisher of Mannville became the bride of Robert Edwin Berks, younger son of Mr. and Mrs. E. B. Allen of Irma. The bride was given in marriage by her father. Mr. Bruce Hubbard was best man. Ushers were Robin Johnson and John Allen. The Rev. V. P. Cole officiated.

The church was decorated with pink peonies and petunias, the altar with peonies and lighted tapers.

During the signing of the register, Miss Shirley Gamble sang "O Perfect Love," accompanied by Mrs. R. Lugg.

The bride wore a gown of white brocade with plunging neckline and fan collar. She wore white lace mittens and carried American Beauty Roses. Her full length veil was held in place by a sweetheart halo.

Miss Jean Fisher was bridesmaid in blue tulle over tulle, festooning short sleeves and a sweetheart neckline. She wore a Juliet cap with shoulder veil. Her bouquet was red roses.

For her daughter's wedding, Mrs. Fisher chose a white floral jersey dress with black accessories. Her corsage was pink and white carnations. The groom's mother had a grey ensemble, white accessories and white carnation corsage.

A reception for 60 guests was held at the bride's home. The room was decorated with pink and white streamers and white bells. The bride's table was covered with a white linoleum cloth, centred with a three-tiered wedding cake flanked by white tapers. The Rev. Cole gave the toast to the bride. Messdames R. Lugg and A. Hubbard presided at the pouring of the wine. Three friends, Misses H. O'Connor, M. Litch and L. Bodard from the Junior W.I. waited on the guests.

For her going away outfit, the bride wore a grey suit with black accessories, a corsage of white carnations. The happy couple motored to Jasper, Banff and Calgary.

Out of town guests included the maternal grandparents Mr. and Mrs. Rice of Viking, the paternal grandfather, Mr. Fisher of Edmonton, Mrs. Fisher of Fort Saskatchewan, Mr. and Mrs. Sydney Fisher of Janisfree, Mrs. Anderson of Innisfree.

On their return the bride and groom will reside in the Albert district.

WALKER — UPTON

A very pretty wedding took place in the United Church in Mannville on June 30 at 3:30 p.m. with Rev. K. C. McLeod performing the ceremony when Alice Mary Upton, daughter of Mr. Geo. Upton and the late Mrs. Upton of Mannville became the bride of Mr. William Walker of Fabian.

Miss Margaret Steele, niece of the groom was the bridesmaid and Mr. George Upton, brother of the groom, was best man.

The bride was lovely in a floor-length gown of white sheer with a waist length veil held in place with a crown. She carried a bouquet of red roses.

The bridesmaid was charming in a pink sheer floor length gown with shoulder veil and carried pink carnations.

A reception for fifty or sixty friends and relatives was held at the bride's home on the lawn, where a buffet supper was served, with the bride and groom and their attendants served at a separate table which was daintily decorated with a three-tiered wedding cake and summer flowers.

Out of town guests were from Wainwright, Fabian, Jarrow and Vermilion.

A wedding dance was held at Roseberry the same evening. Mr. and Mrs. Walker will be making their home with Mr. and Mrs. C. M. Steele for the present. Congratulations and best wishes are extended to the happy couple.

Obituary

Mrs. Rachel Whitbeck passed away suddenly at her home in Irma, Saturday, July 8.

Mrs. Whitbeck was born Feb. 1, 1861, at Flindrew, South Dakota. She was the third child of the late Millard and Melissa Voshell.

She was educated in Iowa and later a teacher in the United States. In 1907 she came with her husband to homestead north of Loughed and there lived until three years ago, moving then to Irma with her husband and youngest daughter.

She was keenly interested in her garden and flowers.

She leaves to mourn her loss her loving husband, one son Albert of Loughed, and two daughters, Ethel (Mrs. Erik Klefstad) of Vancouver and Jennie (Mrs. Clarence Barber) of Irma, 6 grandchildren, three brothers, Charles, Harry and Luther, two sisters, Mary and Ida, all in United States.

Funeral services were held at the Irma United Church at 2:30 p.m. on July 11 with Rev. Forster in charge. Interment in Irma cemetery with MacLeod's Funeral Parlor in charge.

Pall bearers were N. L. Fuder, O. Alamo, P. Grove, T. Clouston, C. Moen and A. Sneathun.

Floral tributes were received from loving husband, Jennie, Clarence, Albert, Barbara and family; Erik, Ethel and John; Donna, Har- old, Louisa, Irving; Mr. and Mrs. T. Clouston; Mrs. J. Ingvaldson and Conrad; Mr. and Mrs. Pete Grove and family; Andy Sneathun; Mr. and Mrs. Ole Alamo; Grandma Anderson; Mr. and Mrs. P. E. and C. Jones and family; Mr. and Mrs. Ross McFarland; Walter and Mrs. Zel Frickelton; N. L. Fuder; Floyd W. Tountledge; Donald Routledge; Mrs. McKay, Donald and Jack; Harold Fuder and family; Carl Fuder and family; Mr. and Mrs. A. Barker and family; Mrs. Owen.

To Bethany Sunset Home, Camrose: Mr. and Mrs. C. Moen.

United Church Fund: Mr. and Mrs. Ross L. Eaton; John, Sophie and Laurus; Mr. and Mrs. W. T. Barber.

Cancer Fund: Mr. and Mrs. R. L. Rohrer.

Protestant Home for Children: Mr. and Mrs. Wm. Masson and family; Mr. and Mrs. J. Jackson; Mrs. B. Hewitt.

Southern Sayings

Mrs. Hunter of Birch Hills, Sask., is visiting her daughter and family, Mrs. Wes Bacon.

Mr. and Mrs. George Jackson and family of Sedgewick were Sunday visitors at the J. Jackson home.

Miss Marilyn Hill is in Edmonton visiting with her sisters and other relations.

We are sorry we had an error in last week's paper as Mrs. E. Tomlinson's brother was not here. Miss Lorna Archibald is visiting with Aletha Hill.

Quite a large crowd gathered at Strawberry Plains School on Sunday and enjoyed a lovely picnic afternoon with a sprinkle of rain.

Metropolitan playing Strawberry Plains to a score of 12-6 in favor of the Mets. The girls and women played the boys and men, the women losing 7-9. A lovely supper was enjoyed by all in the school in the evening.

Mr. and Mrs. Harry Long are away with Mr. and Mrs. Stewart Fenton on the Hereford Tour and intend on taking in a day of the Calgary Stampede on their way home. Mrs. H. Long's sister and daughter are staying with the boys while they are away.

Mrs. Pat Spooner and girls accompanied C. C. Walker to Carstairs to visit with her folks.

Master Gerald Reber is holidaying with his cousins at Hardisty. Mrs. Robt. Whitten and son Ken of Vancouver are visiting their cousins Mr. and Mrs. J. Jackson and family.

Canadian Red Cross Society Blood Transfusion Service

If you were in a position to save someone's life without any pain or discomfort to yourself, what would you do? Would you say "Let someone else do it"? ... would you tell yourself you did not have the time to spare ... or would you come forward and snatch that life back from the dark shadows, knowing full well that if you were ever in a similar position you too would want and expect to be helped? That situation faces you now!

You, Mrs. John Smith, farmers wife, or John Brown, store clerk, you can help save the life of some man, woman or child struck down by accident or sickness. Combined with the knowledge of modern medicine and the hands of a skilled surgeon, you can provide the one spark of hope so often needed to save a life.

The Canadian Red Cross will conduct a blood donor clinic in this centre July 20. The blood thus collected will be distributed to hos-

pitals where patients whose very lives may depend upon transfusions will be able to receive the blood immediately and free of charge.

To supply the needs of the sick and the injured, 700 blood donations are needed every week in Alberta. The Canadian Red Cross Blood Transfusion Service is now the sole source of supply. The blood must be collected each week from voluntary donors in the cities, towns and hamlets, wherever clinics are conducted. Human lives depend upon the success of each clinic ... they depend upon the response of citizens in each community where clinics are held. Donors are only called twice a year.

This means that you are only asked to give one half hour of your time every 6 months, plus a small amount of your blood, to save someone's life. Is that asking too much?

Easterly Echoes

Mr. and Mrs. L. Watson of Edmonton have been visiting at the home of Mr. and Mrs. W. Patterson. While here at his daughter's Mr. Watson celebrated his 80th birthday. Best wishes are extended him from his friends in the district.

Mr. Clarke Steele had the misfortune to strain his back necessitating a stay in hospital. Congratulations go to Mrs. J. Savard and Mrs. W. Bacon who won first prize on their handwork exhibited at the W.I. Constituency Conference at Wainwright. Other lesser prize winners were Mrs. R. Dempsey, Mrs. C. Steele and Mrs. H. Morse.

The Battle River W. I. met at the home of Mrs. W. Dostson. A very enjoyable afternoon was enjoyed.

Mr. and Mrs. Martin Enzer, Joy Arnold and Mr. Ernest Carter motored to Edmonton last week-end. Miss Joy Enzer and Mr. Carter were invited to attend the Summer School Sessions at the University.

Mrs. Stougard was quite ill last week but we are glad to see her about again, her usual energetic self. Mr. and Mrs. Joshua Holt have as their guests their daughter, Mrs. Kurt and daughter Patsy of Indiana, their daughter Mrs. J. Barrett and baby girl of Edmonton, and their son Bill of Kamloops, B.C.

Mr. and Mrs. Stuart Fenton motored with friends to Calgary to take part in the Hereford Tour and also spend a few days at the Stampede.

Carl Fenton is holidaying with his grandparents Mr. and Mrs. James Fenton in Wainwright. Barbara and Henry are with their grandmother Mrs. W. Gray also of Wainwright.

Best wishes for a happy future are extended the newlyweds Mr. and Mrs. W. Walker. Mr. and Mrs. Seth Oldham, Ken and Morris are holidaying at Olds, Calgary and Banff. Eileen is staying at the home of Mr. and Mrs. P. Inklin and Allen at the home of Mr. and Mrs. Leacock.

Mr. T. Hunter of Birch Hills, Sask., stopped at the home of his sister, Mrs. Wes Bacon on his way to Calgary. He was accompanied by his mother Mrs. Hunter who remained at the home of Mr. and Mrs. W. Bacon.

This is a great country when it rains and we are not complaining on that score now. Abundant wild fruit with strawberries as large as tame ones is reported.

The Roseberry P.U.A. wish to say thank you for the pies kindly donated to their booth at the picnic. Winners at softball were Paschen-dale first and Irma second in the ladies. Irma girls won out over Avonlea. Mr. H. Benoit staked his claim nearest the \$5.00 bill.

Mr. Inglis, being on holiday, there will be no evening service in Irma until Sunday, July 30. The Sunday School which has a class for adults will continue every Sunday at 11 a.m. There will be no service at Strawberry Plains next Sunday at 11 a.m. All other country appointments will be closed till July 30.

Mr. and Mrs. W. R. Meakins and Shirley Anne accompanied by Mr. and Mrs. G. Theroux motored to Lloydminster on Sunday, Mr. and Mrs. Meakins visited with D. and Mrs. Fox, an RCAF pal of Bill's, while the Theroux's spent the day at the R. Mazer home. Mrs. Mazer is the former Beatrice Theroux.

Still they come. And this time it's the Jamiesons, with a new Meteor.

At the Churches

AVONGLEN GOSPEL MISSION
July 16 to 22
Sunday

10:45 a.m.—Sunday School and Adult Bible Class.
11:45—Morning Worship Service.

Tuesday
8 p.m.—Prayer meeting and Bible Study.

For the Lord searcheth all hearts, and understandeth all the imaginations of the thoughts: if thou seek him, he will be found of thee; but if thou forsake him, he will cast thee off forever." 1 Corin. 28:9

A cordial welcome awaits you at every service.

ST. MARY'S CHURCH NOTES

There will be celebration of Holy Communion in St. Mary's Church on Sunday, July 16 at 2:30 p.m.

Glen-Coa Gleanings

Mrs. F. Withall and Francis left last week for Knoch-Hill, near Kamloops, to visit her sister whom she hasn't seen for 35 years.

Lilly MacKay is visiting at Gwynne with her sister, Mrs. S. Berg.

Mr. and Mrs. H. Fuder and boys, accompanied by Mrs. A. James, left last Sunday for a holiday at Calgary.

Mr. and Mrs. P. Lindquist and Corinne have returned to their home at Taber.

The new addition to Sharon Church has taken tangible form now as men of the congregation willingly give of their time.

Tuesday's splendid rain came again at an opportune time. How splendid it is to see crops thriving and grass so fresh and green.

Air Rescue Service

THE INCREASING USE OF AIRPLANES has brought about many changes in our manner of living and thinking. The speed of modern aircraft has destroyed distance and has brought cities, continents and countries closer together by reducing the travelling time between them. Aircraft and air-borne weapons revolutionized warfare and introduced many new means of attack as well as of defense. One aspect of flying, however, which receives less publicity than others but which has brought with it many advantages is the search and rescue work carried on with the use of airplanes.

Take Part In Mercy Flights

This service is not only effective in rescuing victims of air disasters, but plays an important part in many other mercy operations which formerly could only be carried out with great difficulty, and in some cases could not be effected at all. Victims of disasters at sea, people living in outlying areas who have become isolated because of forest fires or winter storms, and people lost in the woods or in mountain areas are all aided by the use of airplanes. Another very valuable branch of rescue work is the transportation of people who are ill, from isolated places to hospitals where they can receive care.

Show Skill And Heroism

Many rescue flights are made under hazardous conditions for frequently disasters are accompanied by violent weather, and illness does not await favorable flying conditions. Such work requires skilled pilots and many have shown not only skill but great heroism in carrying out rescue operations. The Search and Rescue section of the R.C.A.F. is permanently responsible for the carrying out of Canada's international commitments to the International Civil Aviation Organization which state that Canada will maintain an organization capable of giving aid to aircraft in distress on the East and West coasts. The R.C.A.F. has also taken responsibility for inland rescue work and will undertake mercy missions when other types of assistance are not available. The service rendered by aircraft in this field is great and is an important contribution of aviation to the public welfare.

RECIPE HINTS

SUGAR-GLAZED SHORTCAKE

Three cups blue-cream mix, 3 lbs. sugar, light cream, 3 lbs. butter, 1 lb. heavy cream, 2 lbs. sugar. Combine blue-cream mix and 3 lbs. sugar. Add light cream (about ½ cup) enough to make a soft dough. Divide dough in half. Pat half into greased 8-inch square cake pan. Dot with half the butter. Cover with remaining half of dough rolled out into

9-inch square. Brush top with cream; sprinkle with sugar; dot with remaining butter. Bake in hot oven, 450 degrees F. about 18 minutes, or until golden brown. Remove from pan; split into two layers. Fill and top with crushed, sweetened strawberries. Cut into squares. Yield 8 servings.

Shipping Season Of Churchill Port To Be Longer

SASKATOON. — Shipping season through the northern port of Churchill, Man., will be at least two weeks longer this season than last, Frank Ellison, secretary of the Hudson Bay Route association, said.

He offered this as rebuttal to a Montreal report which quoted shipping sources there as saying that there probably would be less grain shipped through the Hudson Bay port this season than last. Mr. Ellison said that such reports usually were colored by the desire of eastern shipping interests to "stifle" development of the route.

IN HOSPITAL AFTER EATING FIREWORKS

NEWARK, N.J. — "Mommy, we just ate some candy and our throats are burning," said Sharon Pierce, 4, and her sister, Linda, 3. In hospital, they were reported in fair condition. Their "candy" was pull-sized fireworks known variously as snakes, Sooner's eggs and Pharaoh's serpents. When ignited they resemble small, wriggling snakes.

The Normans began the use of surnames in 1066, the year they conquered England.

Construction Of Spur Oil Line To Start In August

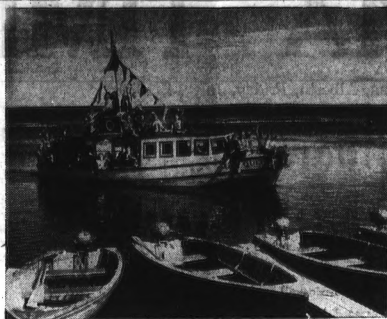

WINNIPEG. — Construction of a \$2,500,000 spur pipeline linking the main oil duct at Gretna, Man., to the refinery plant at East St. Paul should begin sometime in August, officials of the Winnipeg Pipeline company said.

Actual laying of the line will probably take from 60 to 70 days and will be completed this fall, it was reported. The 75-mile, 10-inch branch pipeline will have a 30,000-barrels-a-day capacity.

It will carry oil from the main line Edmonton to Superior Wis. oil line to the Imperial Oil company's refinery on the Henderson highway, 8½ miles north of Winnipeg, which is scheduled for completion in May, 1951.

SPEND LESS ON LIQUOR WASHINGTON. — The commerce department reported Americans spent less on liquor in 1949 than in any year since 1944—\$8,550,000,000, a drop of \$250,000,000 from 1948 and \$1,000,000,000 below the post-war peak of \$9,640,000,000 set in 1947.

FOUNDED IN 1865 The Salvation Army, founded in London in 1865, was first known as the East London Mission.

A boating party on the beautiful Wakashtu Lake, Prince Albert National Park

FUNNY And OTHERWISE

A teacher put a problem to his class: "There were thirteen sheep in a pen and seven jumped out; how many were left?" One of the boys said, "None, sir," and when the teacher rebuked him for his deficient arithmetic and told him he knew nothing about figur-s, the boy's reply was, "Sir, you know nothing about sheep."

Two American soldiers who had just arrived in Britain found the telephone boxes somewhat confusing. One of them was trying to make a call.

After manoeuvring with buttons A-B and dialing the operator, he had just pressed one of the buttons when a V bomb exploded nearby. Stumbling out on his knees, and covered with dust, he found his pal flat on the pavement, somewhat hurt. He said: "Honest Joe, all I did was press button A."

In the club two men of middle age were discussing the young men of today.

First: "Look how reluctant young men are to marry and settle down."

Second: "That's so. They seem to fear marriage. Why before I was married, I didn't know the meaning of fear."

"Hello, Bill. How's your eye getting on?"

"Oh, not so bad, Fred; it's mending slowly. Me and the missus have made it up again."

"That's good!"

"Yes, she only threw the tablecloth at me this morning."

She—You must find collecting a rotten job. Nobody likes to see you. He—On the contrary, they all ask me to call again.

"Mavis danced last night with a young Frenchman who cannot speak English."

"How quaint!"

"Very. This morning she bought a French dictionary and tonight she is going to slap his face."

"Could I try on that red dress in the window?" asked the bright young thing.

"There's no need to do that," the elderly shop-assistant answered coldly; "we have several fitting-rooms."

English Girl To Travel In Rural Sask.

REGINA.—In search of adventure and opportunity, a 24-year-old English girl has travelled more than 8,000 miles to operate a mobile unit for the treatment of arthritis in Saskatchewan.

She is Gwyneth Miller of Dartford, Kent, a London-trained physiotherapist who will use her skill to help arthritis sufferers in rural areas of the province.

Under a 12-month contract with the Saskatchewan division of the Canadian Arthritis and Rheumatism Society she will help to set up an arthritis centre at Regina hospital before going out with the mobile unit. The unit consists of a car equipped with infra-red lamps, short-wave diathermy equipment and a wax bath.

Frozen Apple Juice Suggested For B.C.

VANCOUVER.—Frozen apple juice may give British Columbia's apple industry a big boost.

C. B. Powell, Canadian food broker, back from California, reports experiments now being made in freezing and concentrating apple juice.

"Frozen orange juice has been the biggest thing ever to hit the frozen food and orange industry," he said. Concentrated juices save on freight charges. Mr. Powell said high freight rates cut sales of B.C. apple juice in Eastern Canada.

"Actually you are paying freight on water, which makes up a large part of the juice." If water is removed, charges come down rapidly.

KENVILLE MINE MILL REOPENS

NELSON, B.C. — Kenville Gold Mines mill, six miles west of here, will be reopened after a shutdown of about one year. The lessee of the mill, F. C. Buckland, announces that ore from Kenville, owned by other mining interests, will be treated at mill ore from outside shippers and from mines controlled by Mr. Buckland.

Prior to the closure in 1949, the mill had been run for a year, treating ores on a custom basis.

Approximately 64 per cent. of the bacon exported to the United Kingdom from Canada originated in the western provinces.

United States Prosperity Being Felt By Canada And Britain

(By Forbes Rhude, Canadian Press Business Editor)

Present United States prosperity is the key to much of the optimism in the world today. It is contributing mightily, for instance, to the improved situation in Britain, because of American buying of raw materials in sterling areas.

It is cheering to Canada for two reasons: Because it makes it easier for us to "sell across the border," and because it is supplying overseas customers with dollars with which they may buy from us.

It is only about a year since the talk was of "recession" in the United States. Actually, this turned out to be an inventory recession—a precautionary step taken by business firms to make sure that they were not caught with too much goods on hand. They just stopped buying for a while, but real demand was so great that they had to stock up again and the United States is back in a virtual boom.

At the moment there doesn't seem to be any prospect of an early setback. Canada hardly felt last year's American recession at all, but of course she would have, if it had continued. Of the European situation John A. Marsh, general manager of the Canadian Exporters Association, has this to say:

"Anyone visiting the Canadian International Trade Fair recently must have been impressed with the degree to which Britain and Western Europe have recovered from the Second World War."

"For the first time since the United Kingdom crisis of 1946 there is a real probability that Britain will relax her restrictions against imports."

I Was Nearly Crazy With Fiery Itch—

Until I discovered Dr. D. D. Dimple's amazing fast relief for itching, I could not sleep, eat, or work. I tried everything—baths, ointments, pills, but nothing helped. Then I tried Dr. D. D. Dimple's. The first application checked even the most intense itch or insect bite. As directed on Dr. D. D. Dimple's Prescription (ordinary or extra strength).

CIGARETTE TOBACCO

for those who KNOW!

DEVIL'S FOOD CAKE

Made with CANADA CORN STARCH

½ Cup Shortening
2 Cup sifted All-purpose Flour
¼ Cup Canada Corn Starch
1½ Cups Sugar

½ Cup Cocoa
1 Teaspoon Soda
¼ Teaspoon Cream of Tartar

½ Teaspoon Salt
1 Cup Milk
1½ Teaspoons Vanilla
2 Eggs, Unbeaten

Cream shortening in mixing bowl until light and fluffy. Sift dry ingredients over creamed shortening. Add milk and vanilla. Stir until all flour is dampened, then beat

200 strokes (about 1½ minutes). Scrape bowl and spoon often throughout entire mixing. Add unbeaten eggs and beat 250 strokes. Bake in two 9-inch greased layer cake pans in moderate oven (350° F.) 30 to 40 minutes. Frost with your favourite boiled frosting.

CANADA CORN STARCH

FREE! Jane Ashley's Tested Recipes —Send postcard to Home Service Department, C222, The Canada Starch Company Limited, P.O. Box 129, Montreal.

Tasty? Sure, they're **MAGIC** baked!

GINGER CUP PUDDINGS

Mix and sift twice, then sift into a bowl, 1½ c. sifted cake flour, ¼ c. Magic Baking Powder, ¼ c. salt, ¼ c. ground ginger, ¼ c. ground cinnamon, ¼ c. each of ground cloves and ground nutmeg. Cut in finely ½ c. chilled shortening and mix in ½ c. lightly-packed brown sugar. Combine 1 well-beaten egg, ¼ c. corn syrup and ¼ c. milk. Make a well in dry ingredients and add liquids, mix lightly with a fork. Two-thirds fill greased cup-cake dishes with batter. Bake in moderate oven, 350°, about 25 minutes, or cover each pudding with wet cookery parchment paper, lie down and steam for 25 minutes. Serve hot with vanilla sauce. Yield—5 servings.

THE TILLERS

—By Les Carroll

New Gadgets For the Kitchen

NEW gadgets are on the market every few weeks for the housewife's dream kitchen. Even if that kitchen isn't entirely new, it can still have many of the new small things that go to make work lighter and more pleasant. The newest trend is to match up handles of utensils, or even the utensils themselves, with the general color scheme of the kitchen.

Cannister sets have come out with additions to the basic corn, rice, tea, coffee, sugar and flour sets. Now there are soap boxes, salt and pepper shakers, cake tins that clamp down over the cake plate to keep it deliciously moist, and bread boxes, all decorated with matching designs in red, blue or yellow, on white.

Red and yellow-handled cooking utensils can be matched up with that enamelware, too. Everything from can openers to soap shakers come with colored plastic handles to brighten up those cooking chores.

A new automatic stove really has everything. A black panel contains all the control parts for easy repair jobs. In front an automatic clock timer regulates the oven temperature and time of cooking. The oven comes complete with broiler, and the door has a double heat-resistant glass window that won't fog up to allow a full view of that baking cake without disturbing it. A second storage space can be used for an excellent warming oven to keep food hot up to half an hour.

The four elements are separated in pairs by a wonderful large working space. A utility drawer comes out to allow removal of two porcelain overflow pans which sit under the two sets of elements. The elements themselves lift out for easy removal, aluminum plates can be easily washed.

A new little fruit juice can opener and pouring spout is a useful addition to kitchen equipment. Just press it on to the side of the can, give a twist, and it's ready to pour the juice without spilling a drop.

A trio of wall gadgets all fit into one bracket for a space-saver. A peeler, a knife sharpener, and a sealer-remover can be conveniently stored until needed and then fitted into a small bracket on the wall or side of a cupboard. The can opener may be obtained with a magnetic attachment which holds the pot secure until removed from the can.

An easily washable dust mop just on the market had a ball socket on the handle. By a quick flip of the handle, the mop becomes a scrubber wide as the space demands. A zipper closing makes the head easy to remove for washing, and a detachable attachment allows free movement for shaking dust out.

A scrubbing mop, of especially absorbent sponge, has an attached wringer, that squeezes out water in a jiffy.

Exercise Rubs Out Wrinkles

The lines that form at the sides of the mouth and on the forehead after 40 are aging to any woman. But there are facial exercises to help combat these lines.

To erase the "parentheses" around your mouth, open your mouth wide and try to close your lips over the open teeth. This is impossible, of course, but slowly close your jaws part way and you'll find your lips close your lips at this point. Repeat the exercise five times, slowly. You are simply smoothing out those lines, making it impossible for them to go deeper.

Getting rid of forehead wrinkles is easy. Put your hands flat on your forehead. Then push the skin up as far as you can and, holding it that way, use muscular action to try to pull the skin down again.

You may, of course, use the small adhesive patches which make it impossible for you to frown. But these can be worn only in the privacy of your own home and prevent new wrinkles rather than remove lines already there.

GOLDEN OPPORTUNITY

The great liner was laboring in a heavy sea, but the captain assured his passengers that there was really no great danger. But one minute later the liner lurched and again, "Are you sure we're not going to sink, captain?"

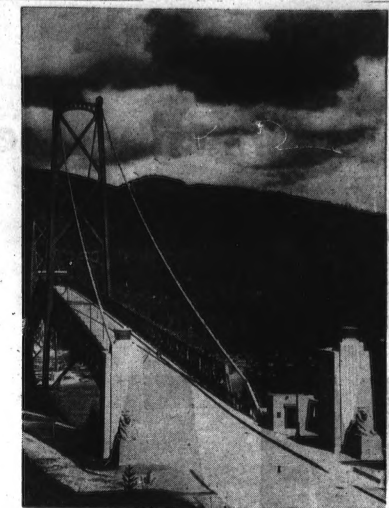

At last the captain lost his temper and demanded, "What are you — a coward?"

"Not at all," the little man assured him. "I'm not the least bit afraid." "Then," said the captain, "you must want to tell your friend good-bye before we go down."

"No, no, it's not that," the noisy passenger protested.

"Then, in Heaven's name, why do you ask me every five minutes if we're going to sink?" the captain demanded.

"Well, if you must know," the anxious passenger rejoined, "I've got my mother-in-law on board with me, and if you should become certain—quite certain—that we're going down, I want to know. There's a few things I'd like to tell her!"

THE LION'S GATE BRIDGE, at Vancouver, will be a spot that will be visited by many tourists from the prairies this summer.

Ability To Become Rich Is A Gift And Price To Be Paid Is Very High

(By Sydney J. Harris)

CHICAGO. — More nonsense has been written on the subject of money than on any other subject in the world, except love. Whilst, in company with the best philosophers, I am ignorant about love, I have studied the subject of money and think I understand it pretty well.

The reason some people can make money and others can't has absolutely nothing to do with the virtues and vices ascribed to them. A man who knows how to get rich is not brilliant, forceful, courageous or superior in any way to his fellow men; neither is he crafty, dishonest, depraved or in any way inferior to his fellow men.

The ability to make money is an isolated talent, like being able to wiggle your ears, and deserves no more praise or blame than this. Some persons are naturally gifted at turning one penny into two; others are

remarkably consistent in losing the first penny.

It is ridiculous either to revere or despise the rich. All the platitudes on the subject are worthless: perseverance and honest toil will not make you rich, and dishonesty is as likely to land you in prison as in a pent-house. There are absolutely no rules or recipes for financial success.

There is only one axiom I am reasonably sure of: If you want money hard enough, if you want it more than anything else in the world, and to the exclusion of everything else in the world, you will get it. The price you pay will be high, but the fanatic is willing to suffer for attaining his goal.

The only thing the money-makers have in common is the intense desire for money as an end in itself. They are dedicated to a cause, and when this dedication is combined with the peculiar talent for acquisition of material things, success is sure to be theirs, no matter how stupid they may be in all other respects.

It is as futile for people like me to try to get rich as it is for an armless man to paint a picture. Misery and frustration await those whose ambition exceeds their abilities. The only sensible procedure is to dedicate ourselves to other values and find happiness in them.

The earlier in life we learn this lesson the more contented we will be. Lacking the concentrated sense of aversion (which is more of a curse than a blessing), we can free ourselves to concentrate on the pursuit of truth, of beauty, of love and friendship, and all the other consolations of human life.

JUDGE PROVED WORTH OF PEACE FORMULA

PATERSON, N.J. — Judge Milton Schamach's peace formula worked. Al Daniels, 44, and David Simon, 55, joked and slapped each other on the back when released from the jail cell in which they had been locked for 12 hours.

This ended their feud of years' standing. Rival street gangs, they fled assault complaints against each other. Schamach ordered them locked up in the same cell so they could "learn to live together."

To Feel Right — Eat Right

BROTHERS COLIN AND STANLEY SMITH, who recently sailed to England, denied reports that they have given up their plans for a Utopian colony in Nova Scotia. They have returned to Europe and Britain to organize some 400 people who have requested a part in the co-operative village. Both are expert boat builders, they built the 20-foot sailboat in which they sailed to England last summer to attract attention to their plans for Nova Scotia (New Hope) Island. They will spend some time in Europe lecturing and choosing new recruits for the colony.

A Spray That Will Slow Up Grass Growth

(By Sydney B. Self in the Wall

Freedom Street Journal)

Freedom street lawn mowers is a future possibility that should bring cheer to commuters and small boys. Scientists for U.S. Rubber Co. have developed a new type of seed killer named maleic hydrazide that has a variety of remarkable properties. For one thing, it is efficient in killing off various grasses that are a pest to the farmer. But beyond this it is what is called a growth inhibitor, which means that when properly used it will slow down growth without killing the plant.

Preliminary tests in New England show that the material when sprayed once on a blue grass lawn killed off intruding crab-grass and also retarded the growth of the blue grass for six weeks without hurting it. When tried on a fast growing pycnantha hedge in California growth was slowed down so that only two cuttings a year were needed instead of two a month.

The scientists caution that extremely precise amounts of the material must be applied to get results like this without doing damage. So they do not think that makers of lawn mowers and hedge shears will have to worry for a long time. Their chief present interest is to develop important agricultural uses for the material. Meanwhile at least a year of careful tests at research centres will be necessary before it can be put on the market.

One major use for maleic hydrazide, it is thought, will be to clear southern farms of Johnson grass and quack grass, which are hard to eradicate by cultivation. With a dose of the drug, young grass is killed and older grass stopped from seedling.

Another interesting use may be spraying of strawberry and raspberry plants. This delays fruiting for about a month so that the season of bearing can be prolonged. Nurseries can use it to keep dormant trees from sprouting before the shipping season arrives.

If root crops, such as potatoes and onions, are sprayed before harvesting, the vegetables are prevented from sprouting in storage and so do not spoil.

Freak Winds Hit Planes At 20,000 Feet

ASHBURY PARK, N.J. — Problems of flight 40,000 feet above the earth in turbine-powered aircraft were discussed at an International Air Transport Association technical conference here recently.

One of the striking problems of upper air travel the group noted was freak wind currents which streak unpredictably at 20,000 feet or higher, sometimes extending 1,000 miles or more.

Meteorologists said they found these "jet streaks" hard to locate, but that they are not particularly frequent or uncomfortable to fly through.

The group heard that enough is now known about weather conditions at 20,000 to 40,000-foot levels to make jet and turbine aircraft high-altitude operations completely safe.

The symposium also agreed, however, that precise information must be worked out before commercial flying can be made economically attractive.

WINDOW SHADES OUT OF STYLE

ILKESSTON, England. — Residents here want bus stops rearranged because the present halts allow topdeck travelers to view second-story bedrooms.

NO WORRY ABOUT PATIENTS—As long as there are ships on the North Atlantic Dr. J. E. Labrecque won't have to worry about where his next patient is coming from as the doctor hangs his shingle on the government pilot boat, Citadelle at Father's Point, Que. His job is to check the incoming passengers, to see that they have the necessary medical papers before entering the country, and looking after any needy cases. In the above photo Dr. J. E. Labrecque, left, lounges on the rail of the government pilot tender Citadelle, before moving out into the river to meet an incoming liner. With him is Dr. Henri Lajurin, another sea-going medical official.

COURTESY CHEATS DEATH

LOUDSPEAKER AT CROSSING CUTS ACCIDENT TOLL

In Hastings, historic town in Southern England, there is a spot where eight roads meet. It is a natural place for death to lurk, yet it has been accident-free for fifteen years. The London Daily Herald explains that the record has been achieved by kindness.

Traffic is controlled by an officer in a police car equipped with a loudspeaker. The constable speaking into a microphone, gives directions such as this: "Will the gentleman go to the nearest crossing, please. That's right." To a truck blocking the view of cars behind it he might say: "Give a good clear signal, please. Sir." When a gasoline truck driver stopped to signal pedestrians across the officer said to him, "Thank you, Mr. Gas Board."

Hastings is proud of its microphone courtesy campaign and believes it is winning the battle of the roads. First-time traffic offenders get blue films which explain the offense and request them to be more careful drivers and careful children.

You Can Ruin Your Concrete

Don't use too much water in mixing concrete and don't forget to screen the pit-run gravel. The advice comes from the Experimental Farm at Swift Current, Sask., where special attention is given to farm engineering.

Think of a brick wall. Here large pieces of baked clay (bricks) are held together with mortar. A mortar that is too "sloppy" oozes out, and a weak wall will result. In many ways, concrete is similar to a brick wall. Coarse material is held together by mortar. The mortar in this case is a mixture of sand, Portland cement, and water. This is mixed along with the coarse material all in the one operation.

The strength of the mixture, when it has "set," will depend upon the amount of water used in relation to the cement. Note this point: It is the amount of water used in relation to the cement that is so important. The dealer from whom you buy your cement will be able to get useful bulletins on mixing and using concrete for you. Ask for "Quality Concrete" and "What the Farmer Can Do With Concrete". These are published by the Portland Cement Association.

It pays to screen pit-run gravel. Then use the coarse and fine material according to the directions. If too much fine material is used in relation to the coarse material, more cement will be required. At the Swift Current Station, most pit-run gravel contains too much sand. It was found that a man's wages could be paid to screen the gravel. A good workman would handle enough material in an hour to save nearly one sack of cement.

Properly graded aggregates (sand and gravel), the right amount of water and cement, will give a dense and strong cement at a minimum cost.

KEEP RECIPE FILE CARD

Here's a tip for keeping your recipe file card. Mix a little of baking and cooking powder with amounts of shells and meat in a natural alcohol and store in a cool place on each card. This will keep the surface which you use with a damp cloth it imprints its fall on it.

The people of the United States consume more ice cream than those of any other nation.

Picto, New International Language

—EASILY LEARNED

LEAMINGTON, Warwickshire, England.—Speak Picto and you will be understood by the French, Germans and the Russians. What is more you will be able to understand them.

This, at any rate, is the claim made by a 45-year-old bachelor artist, John Williams, for his new "international language."

Williams, a propagandist for the United Nations, says it can be learned in an hour, and is better than Esperanto. He guarantees that a business man can send a letter in Picto, enclosing the key of 100 words, to a foreign firm which has no knowledge of the language and it will be understood. "Although Picto looks like bad English, it must not be judged as a form of English, but as a new, international language," he said. "It is not, like basic English, an attempt to express all meanings in a limited number of words."

He describes the 600 master words, 500 of which are English, French, German and Russian, as "check-words" of 50,000 new international words.

"Chinese, using only 400 master words, is constructed on the same principle," he said. "The Picto elements represent basic meanings, just as basic English does in its 850 words, but instead of using them separately they are compounded to make new words."

"Thus the meaning of each compound word is clear from its construction and one has only to learn the 100 words not already familiar to read anything to the language."

Williams believes that his Picto will straighten the world out considerably. "If the nations cannot agree to form a world federation on democratic lines they will be destroyed by the hydrogen bomb," he said. "But a world democracy cannot be formed without world newspapers in a world language."

Teak, Most Valuable Wood

One of the most valuable woods in the world, teak has been known and largely used in India for more than 2,000 years. Its extraordinary durability—even in warm countries—is remarkable. Examples of wooden beams made of teak are often found in India and Burma in buildings many centuries old, and instances have been known of beams lasting more than 1,000 years.

In its youth the tree grows with extreme rapidity. Two-year-old saplings on suitable soil usually reach a height of five to six feet in ten feet. In fifteen years the average height is sixty feet with a girth of nine inches four or five feet from the ground. Mature trees are usually anything from 100 to 150 feet high, and are often from 100 to 200 years old.

Teak is used for shipbuilding, furniture-making, for door and window frames, and for many other purposes.

HART, NOT BRAINS MAKES HORSE SMART

AURORA, Ont. — Margaret Watkins, who passed up a career as a commercial artist to become a horse trainer, now is schooling horses for steeplechase events on Ontario race tracks. She starts to ride horses while studying art for a career and decided to forsake the brush and easel.

Winner of several awards in the ladies' hunting classes at the Royal Winter Fair, Miss Watkins believes that the intelligence of horses is often overrated. "Horses form a habit and always follow the same pattern," she says.

A Farm Storage Tank Doesn't "Cost" IT PAYS!

A farm storage tank permits you to buy and store enough fuel at one time to be sure of having a supply on hand when you need it. No costly delays when tractors stand idle, waiting for fuel to be delivered.

It helps to keep fuel clean and avoid plugging of fuel lines and carburetors with grit, dust or water. The tank can be mounted with enough slant to cause any impurities to settle away from the outlet.

It saves time in re-fueling tractors and trucks, if the tank is mounted overhead. Gravity flow is quicker than pumping or pouring. It prevents the spillage of the pump-and-pull method... or the wastage of the "last gallon" that is often left in the bottom of each barrel.

A farm storage tank pays in added safety, because it can be located well away from house, barn or sheds.

Tanks come in three sizes. The price is reasonable. See your Imperial Oil Agent.

News Items From Kinsella and District

A Sunday School picnic was held at Camp Lake on Monday afternoon, when thirty-five children and adults attended. The weather was ideal and the lake looked very lovely and inviting. The children enjoyed bathing and everyone did full justice to a bountiful picnic supper. At the close the children entertained the adults with community singing.

Miss Audrey Barker is spending two weeks with relatives at Minburn.

Malcolm and George Loades are spending a holiday with their uncle at Mannville.

Mrs. R. Arkinstall is visiting her mother in Edmonton. Mrs. K. Sandberg and children of Viking and Miss J. Wold of Vancouver were the guests of Mr. and Mrs. A. Barker last week.

Miss Betty McMillan of New Westminster is visiting her friend Miss D. Bee.

Mrs. A. Darroch and son Robt. of Toronto, who are visiting Mrs. Darroch's parents, Mr. and Mrs. A. Milne, are gone to Calgary to visit relatives and attend the stampede.

Mrs. R. Stevens is spending two months with relatives and friends in Calgary.

Mrs. L. Townsend of Mannville has spent the week with her mother, Mrs. Jewett and other relatives here.

Mr. and Mrs. C. Smogard of Edmonton were the week-end guests of Mr. and Mrs. E. Simmons.

Don't forget the "BIG DAY," Kinsella Sports, August 2.

Ontario Needs Farm Workers

Alberta farm workers are again responding to the call of the farmers of Ontario to help with their haying and harvest. F. E. Newcombe, Secretary of the Dominion Provincial Farm Labour Committee, advises that the movement from Alberta has already started and those interested in this work should make application right away. Men with farming experience who are between the ages of 17 and 80 years are required.

Those accepted will have to pay \$10.00 only towards cost of the going fare. On completion of the work towards the end of August they will be able to buy a ticket home for \$11.50. This movement is one way in which we can show our appreciation of the farm help received from Ontario in our times of need. It also offers with pay, an opportunity to those taking part to broaden their knowledge of Canadian agriculture and conditions.

Competent farm workers from Alberta who are interested in this trip to Ontario to help with the haying and harvest can obtain full information and application forms from their district agriculturist or from the nearest Employment Service Office.

What is Communism

There is a great preponderance of public opinion in Canada in favor of some further action by the government authorities against those who openly advocate Communist doctrines in Canada, and particularly those who make it quite clear that, in the event of an unhappy conflict between this country and Russia, they would be on the Russian side of the argument.

There are plenty of people like this. There are university professors, school teachers, labor leaders, and even clergymen who quite openly take this stand who quite frankly say, as did a French socialist who has been recently fired by the government, that they would not support their own nation against Russia in war.

The real difficulty is that this is not all that there is to Communism. Provided a Communist does not go to the point of announcing that he would fight for Russia, it is difficult to find the point at which Socialism, or even welfare state ideas end and Communism begins. Anyone who believes that the major industries of this country should be taken over by the state, anyone who holds the state should permanently control prices and wages, anyone who feels that the state should have the power to direct men and women to particular occupations is a Communist, in the sense that he has accepted the theories of the founders of Communism.

The man who preaches these ideas may say that he is a Conservative, or a Liberal, or a Socialist, but he is preaching Communist doctrine. He holds much of the Communist faith—even if he does not go to the point of announcing that he would fight for Russia against Canada.

It is very difficult to see how the law which Mr. Drew has been suggesting, to make Communism illegal, would be enforced in Canada. There should be some law in Canada, rigidly enforced, to put in jail those who openly attack their own country on behalf of another nation which is at present coming close to threatening war. The point is, however, that it is not going to be possible to catch them as Communists. They will have to be caught as traitors.

If Moisture Available Sow Forage Crops Now

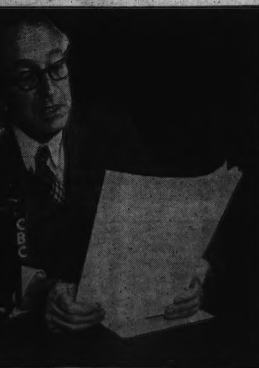

Following recent rains, many farmers are asking if it is too late to sow forage crops. J. E. Birdsall, Supervisor of Crop Improvement, Alberta Department of Agriculture, says that there is still time if the land is in proper condition. If there is any reasonable amount of moisture, sowing of forage crops should be done at once.

To those who are thinking of sowing forage crops in fields where the grain is already a few inches high, Mr. Birdsall says that this is a questionable practice. The grain will offer undue severe competition to the small forage seedlings.

If seeding into land that is not plentifully supplied with moisture extreme care should be taken to see that the land is very firm before the seed is sown.

Canadian industrial enterprises not taking into consideration at all our agricultural enterprise, today provides jobs for 140,000 workers.

EVENTIDE

The Voice of Eventide is that of E. V. Young, radio actor who is heard in numerous dramatic productions originating in the CBC's Vancouver studios. Every Thursday night Eventide listeners hear him reading extracts from the rich heritage of Christian literature.

ARMDALE CHORUS

Twenty-seven girls—including Mary Dee Girroir, the leader (centre)—make up the Armdale Chorus, which broadcasts on Saturday nights. The group is named after the suburb of Halifax where—eleven years ago in a public school classroom—several of the present members first made music together.

Viking Items

Albert Sutton of Tofield, employed on a ditcher for the N.W. Utilities, had his left arm practically torn off when he reached into the ditcher to release some weeds and roots. He was taken to the Viking hospital where his arm had to be amputated at the elbow. He survived the shock and is reported to be doing as well as can be expected.

At a meeting held by the Viking Elks and the Viking Legion, a committee of three members from the Elks and three from the Legion and one from the Viking Agricultural Society has been appointed to organize a "Bee" to be held at the fair grounds to fix up seating arrangements, booth, ball grounds and race tracks. This "Bee" will either be held on July 26 or August 2, or possibly some other date not yet decided upon. The intention is to hold a community sports day some date early in August. The Legion executive is in correspondence with the famous "King and His Court," four man fastball aggregation now touring western Canada, for a date to come here to play an all-star team, and in connection hold other sports to make up a real community sports day.

The community sports committee is made up as follows: Legion, Fred Roddick, Len Forster, Gordon Ash; Elks: Stubb Trueman, Roy McDonald, M. Lausien; Agricultural Society: G. Thunell.

A memorial service was conducted by Rev. I. J. Saugen in the Golden Valley Lutheran Church on Sunday morning, July 9 at 11 a.m. for the late Lenard Elov Nordstrom, RCMP. The Police Force was represented by the attendance of Corporal Martin, Camrose; Constable de Grace, Camrose; Corporal Brandon, Hardisty, and Corporal Hobbs, Viking.

Lenard Nordstrom who met his death by drowning on the evening of June 24 while swimming with two other constables in Ear Lake, approximately three miles south of Whitehorse, Yukon Territories, was the second youngest son of Mrs. Ida and the late Otto B. Nordstrom.

An RCMP funeral was held on Tuesday, June 27 at 2 p.m. from the Old Log Church and the body was laid to rest in the police plot at Whitehorse with six members of the force acting as pallbearers. Flowers from the family were forwarded for the funeral. The Them Kjar family, formerly of Viking and now of Whitehorse, were in attendance.

Lenard received his early education at Lake Thomas and Viking Schools, and joined the RCMP in the spring of 1948. He received his basic training at Regina and later went to Rockcliffe, Ont., for further training. He was stationed at Vancouver, B.C., for a short time before leaving for Whitehorse where on June 1 he was promoted to first class constable.

At the time of his death, Lenard was 23 years old and nine days of age. He leaves to mourn his loss, his mother, Mrs. Ida Nordstrom; seven brothers, Nels, Alfred, Palmer and Olaf, all of Viking; Julius and Alvin of Edmonton; Henry of Ponoka; and two sisters, Mrs. Inga Thengs of Viking, and Mrs. Sophie Benson of Edmonton.

During 1949 Canada's flour mills produced 19,956,000 barrels of flour.

Plant More Trees

When winds are high, tempests fly. You may have noticed that in times of high wind and blowing dust almost everyone has a chip on his shoulder. It is often unwise to try to knock it off, particularly if you are carrying a similar chip yourself. Perhaps the wisest course is to temper the wind and thus help to remove the cause of irritation.

One way to do this, says A. M. Wilson, Alberta's Field Crops Commissioner, is to plant more trees around the farm and farmstead. Trees beautify the surroundings. They lower wind velocity in the sheltered area, reduce soil drifting, check excessive evaporation and protect the crops and gardens. They help to hold the snow, so that in the spring it is released gradually into the thawing land to build up those much needed moisture reserves. Wise tree planting really makes life worth living.

Like everything else worth while there is a certain know-how to tree planting. Planning and preparation are essential in the year before planting, the land should be thoroughly summerfallowed to conserve moisture and destroy weeds. Early ordering is important too.

Trees for next season may be ordered now from the Dominion Forest Nursery Station, Indian Head, Saskatchewan, or from the Department of Land and Forests, Ottawa, Ontario. Orders should be placed early. The demand is keen and there is no assurance that trees can be provided from these sources if ordering is delayed even until early fall. Information on ordering trees, and suggestions on land preparation and tree planting for your farm can be obtained from your District Agriculturist.

A Wise Family Eats A Good Breakfast

Miss Joyce Lewis, Nutrition Specialist, points out that no sensible person would think of starting out for a day's trip in a car without first checking his gas and oil supply. Yet, she asks, how many people start the day with a breakfast of toast and coffee—or perhaps only the coffee? Our "Human Engines" need fuel too, and also food material to regulate body activities. In addition, our food must supply material for upkeep and repair. These essentials are apt to be on the short side unless we have a good breakfast.

In the wise household, there are no cries of "I don't have time for it" or "I'm not hungry in the morning" or "I don't want to gain weight." They have proved that the problem of those who "don't have time" is simply one of management—or perhaps getting up a little earlier. Each member of the family plans a morning schedule to include time for eating breakfast.

Those who "just don't feel hungry in the morning" will discover that the habit of eating breakfast in itself promotes normal appetites. It may take a little pampering at first, says Miss Lewis. It may even mean "Spurging a bit" to serve favorite fruits or bring out the prettiest tableware. Clean neat service and colorful foods and dishes help stimulate the flow of digestive juices. Once the breakfast habit is established, people discover how much better it makes them feel.

Those who are concerned lest they gain weight will discover that a good breakfast will curb their desire for extra snacks and for too much food at other meals. A well chosen breakfast will help maintain health while they are trying to lose weight.

Great Air Battle Between Eagles, Storks

A great air battle between a large flock of storks and a raiding party of eagles was fought recently near the little Spanish town of Zorita, in the lonely provinces of Castiles, near the Portuguese frontier.

This is a favorite nesting-place for storks, for here they are usually left in peace. One day recently, however, their peace was rudely disturbed!

A party of about forty eagles arrived from the distant mountains and attacked the nests of the storks, carrying off many of the young. The next day the same thing happened. This apparently was too much for the storks. The same evening Spanish workmen in the neighboring fields saw a great company of about eighty of the long-beaked storks, and birds in urgent conference. After a time eight storks detached themselves from the others and flew off in different directions, as if on a mission.

Two days later the result of this was seen when about 200 storks began to arrive from all directions, swelling the stork colony to unheard-of dimensions.

The next time the eagles came over on a marauding expedition the storks savagely attacked them, three or four storks to each eagle. Although the surprised eagles were nimble and more maneuverable in the air it seemed to be the aim of some storks deliberately to crash into them in mid-air while the others thrust at them with their beaks. The battle, watched by all the villagers for miles around, lasted for half an hour. At the end of that period over a hundred storks lay dead on the ground, but they had accounted for every one of the invaders. Then the surviving storks of those who had come to succor their comrades flew away again, their mission nobly accomplished.

Farmer Makes Thriving Farm Out Of "Jungle"

Six years ago, Charles W. Baker, a Sussex farmer, was offered, near Billingshurst, Kent, 37 acres of land completely covered with haws, scrub, fern, bracken, and a few trees. Just like that—no roads, no buildings, no pipe water, nothing but wilderness.

For 20 pounds an acre (equivalent to \$60 Canadian an acre) he bought the jungle and set to work to make it into a farm. His brother-in-law worked with him, and the two men, one of whom was over 70 but an experienced wood-cutter. First, they cut a track right through the middle of the wood linking at two points the main road which bordered the property. Then they dug the whole track out to a depth of two feet, filled it with cordwood, covered it with a thick layer of hard core and rubble and rolled it in. Later it was tarred, gravelled and sanded with a good surface. Acres by acres the woods were cut and fenced into ten-acre enclosures. The sale of undergrowth for fencing poles, pea and bean sticks just paid for the labor of cutting. Directly land was fenced, pigs were turned on to it. They were given no supplementary food but found the whole of their living from ground ivy, nettles, bracken and other weeds. As the bushes began to sprout, the pigs ate off the sprouts and eventually killed the stumps.

Five hundred day-old pullets were bought and reared under broody hens; 50 chickens and two broody hens in each of ten small houses. When old enough the chickens were allowed to run out in the cleared jungle.

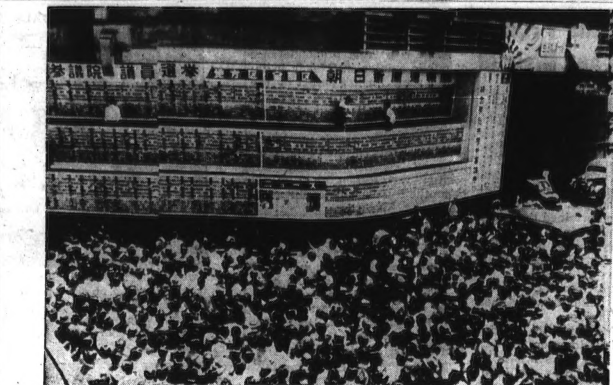

Charles Baker designed a Scandinavian pig-house, 100 feet long and 32 feet wide to hold 200 pigs, the progeny of the 25 jungle-fed gills which had averaged 10 pigs per litter. He employed a bricklayer to help him build this house. Then on a plateau on the crest of the land he built the farmhouse.

Next, Baker built a house 70 feet long and 18 feet wide in which to keep hens in batteries. That was early last year and today there are 600 hens in batteries and 800 in the cleared jungle.

Soon contractors will clear the land of stumps and plow it to a depth of one foot. They will leave it ready for cultivating during the coming summer and sow wheat next fall. That will cost £20 (\$60 an acre) so the total cost, including the freehold, but excluding the house and buildings, will be £40 an acre (£120 an acre).

Five bacon pigs and over 8,000 eggs now leave the farm every week. The cheques amount to well over £200 (\$600) a week, so the jungle of six years ago is today providing £10,000 (\$30,000) worth of food for Britain every year.

Yale university in 1885 built the first baseball batting and fielding cage

SCOREBOARD SPELLS END OF JAP REDS—A large group of Japanese people are shown watching the results of the Japanese House of Councillors election as they were posted up on a tally board. With Premier Yoshida's Liberal party emerging as the strongest single group in the diet's House of Councillors, on top of its majority in the lower chamber, the government instituted fresh measures designed to curb and eventually eliminate Red organizations.—Central Press Canadian.

Things That May Be Of Interest To You

TORONTO. — Here are some things that may interest you:

A filter which promises to make it unnecessary to ever change the oil in your car; instead, change the filter every 2,000 miles.

A synthetic resin, still in "blue-print" stage, which acts like a starch and will stay in your shirt collar or other clothing through five or six washings.

Another resin which, when applied to fresh vegetables, will allow them to stand for 10 days without losing their freshness.

These and many other things are being discussed at the four-day conference of the Chemical Institute of Canada, which opened June 19. They are things which will revolutionize living in the next few years.

And here are more examples of things done or in the course of doing:

Weed-killer sprays which destroy broad-leaved plants and spare the narrow-leaved varieties. At a cost of 80 cents an acre, wheat crops can be increased by as much as 10 to 20 bushels an acre; and when the wheat is harvested it contains virtually no weed seed to reduce its value.

It is expected that 14,000,000 acres will be sprayed in Canada this year as against 8,000,000 last year.

Plant hormones, which affect the rate of growth, make it possible to harvest as many as three crops of tomatoes in a season, thus making for a more even market supply and for steadier employment.

"Cold rubber" is expected to make passenger-automobile tires which will last 100,000 miles, and truck tires which will last 60,000 to 80,000 miles.

New textile fibres promise materials which are mildew-proof, shrink-proof, perspiration-proof, moth-proof.

The three-day meeting is sponsored by Johns Hopkins University's McCollum-Pratt Institute. Scientists from as far away as Australia are in attendance.

Dr. W. D. McElroy, director of the Institute, told about the black sheep turned white sheep at the opening session.

Traces of copper in the soil, he explained, act as a catalyst—the minute bits stimulate other chemical reactions, which in turn have a direct bearing on the health of plants grown in that soil.

There are great stretches of copper-deficient land in Australia.

Sheep grazed on this land produce "stale" wool which has little elasticity and makes a poor grade of cloth, Dr. McElroy said.

The addition of copper corrects this condition. But it must be added to the soil and thence to the plants that feed the animal, he explained.

It does no good to feed copper directly to the sheep.

Sculptor Hopes To Prove Chinese-Indian Theory

VANCOUVER.—A Vancouver woman's fascination for skulls may prove the theory that British Columbia Indians originated in the heart of China.

Mrs. E. C. Von Engel-Balersdorf, assistant curator of the Vancouver Museum, is a sculptor who re-creates heads from ancient skulls. Her researches have led to substantiation of the Chinese-Indian theory.

Mrs. Balersdorf lived six months on the Anahim Indian reserve, at Hanceville, B.C., taking hand measurements, handprints and samples of hair.

The measurements match Chinese measurements, prints have the whorls of Chinese fingerprints, instead of the combination whorls and arches the whites have, and the hair is the straight variety known to Chinese, instead of the wavy hair of whites or kinky hair of Negroes.

NEW SAFETY OFFICER

WINNIPEG.—The appointment of Capt. Adam H. Laing, formerly of Watrous, Sask., as safety officer for army prairie command headquarters has been announced by army officials. Prior to his present appointment, Capt. Laing was attached to the directorate of organization at army headquarters, Ottawa.

Good Enough Reason, But Fined

Car chases at top speed apparently aren't confined to cops and robbers—romances and blondes get into the act at times, too. Police testified in an Edmonton court recently that a man, stopped for speeding, said he was following two blondes in the car ahead. "That's a good enough reason," said the judge. "But don't follow any more blondes or you'll lose your licence." He fined the man \$25.

Budget Easy Yet Eye Appealing

Short, white nylon gloves, with double pleated ruffled cuffs are the answer to an immaculate summer. Black velvet piping on the straw bonnet is a new summer note. Budget easy and practical is this navy and white cotton plaid sunback frock with bolero. White pique cuffs the dress bodice.—Central Press Canadian.

Hudson Bay Affects Weather

Does Hudson Bay freeze in winter? What happens in fall, winter and spring on that vast body of water has a lot to do with the weather from the Atlantic coast to Manitoba. It can determine whether Montreal, Toronto or Ottawa gets rain, snow, hail or clouds. It plays a part in weather forecasting on the western end of the trans-Atlantic air and shipping routes. There's a defence consideration too. Obviously whether the huge bay gouging the northeastern part of the continent freezes completely in winter is significant from a military point of view.

Just in case you are interested, meteorologists — and the defence people too — now are sure that Hudson Bay does freeze every year. They've been pretty sure for some time, but now they have photographic evidence.

Last winter a Lancaster of the R.C.A.F. made four flights over the bay. Aboard were McGill University geographers and defence research board and transport department personnel.

Aerial photographs were taken showing the bay completely frozen over.

The flights were to get meteorological data but the Arctic research branch men of the defence department had more than a casual interest. However, their part in the survey came under military security.

There was a time when it was believed the bay did not freeze completely. In fact a government commission back in the early 1900's investigated the whole matter as thoroughly as was then possible and came to that conclusion.

Meteorologists say air masses moving down from the Arctic when Hudson Bay is clear of ice pick up comparatively warm moisture from the water and are warmed. The moisture may be dropped in the form of rain or produce clouds.

When the air masses move over solid ice in the bay, the warming modifier is missing. The Arctic air, mass is still pretty cold when it gets where it's going.

NEW FISHING GROUNDS

NINGA. Man.—The streams and creeks running through the Ninga and Boissevain areas are carrying a lot of suckers this year and fishermen are hoping that pike and pickerel will follow. The streams have had no fish since the dry years of the 1930's.

Kilt Mystery Solved

LONDON.—Ever wonder what Scotsmen wear under their kilts?

London got to the bottom of the question recently.

A youthful Scot taking part in a London folk-dancing display forgot to fasten his kilt pins, and wound up staggering with the kilt wrapped around his ankles.

The answer: a pair of brief trunks.

IN THE SWIM — Allover striped black nylon bathing suit with or without straps.

Vacation And Sports Demand Good Equipment

Since the days when golf was played only in the rolling hills of Scotland there has been a constant and gradual improvement in the quality of golf play and equipment. It used to be that only the very rich could afford the handmade equipment and the time that it required to become proficient in this sport.

At one time the making of golf clubs was a job of great skill practiced by only a few "professionals". Each club was completely handmade and players carried only 4 or 5 clubs.

The early days of golf the development of mass production methods has made the making of even finer "woods and irons" possible. Now the average golfer can afford to buy the very finest equipment. New improvements in club shafts and heads have been suggested by golf professionals; entirely new clubs have been developed. Even as recently as the last 10 years have seen a slight change in the No. 1 driver. (A slight loft has been given to this wood by most manufacturers making it possible to lift a ball off the grass).

The many improvements in golf equipment have made it easier to learn this great game. It is now possible to buy matched sets of clubs in many different styles and sizes. This means that a capable sporting goods dealer or golf pro can sell clubs of proven quality and in the size, style and weight best suiting the prospective buyer. Good clubs mean a better game and sport equipment dealers and manufacturers are constantly searching for new and better developments for both Pro and "Duffer".

It has often been said that the invention of the "circular wheel was the beginning of industry as we know it today. Certainly the inventor of the first ball was the father of many of today's sports!

Every day, throughout the entire world, people swing a golf club, push, roll, tap and hammer balls in the pursuit of pleasure. Balls of leather, ivory, wood, air-filled balls and plastic balls. A vast industry has sprung up to cope with the enormous demand for balls and for the clubs, sticks, rackets and various methods of knocking the balls around. The sports industry today is a serious business. Whatever particular sport is involved, the player is assisted by the scientific manufacture and "know how" that goes into today's equipment.

For the fishing enthusiast the modern range of fishing equipment presents a bewildering array of glittering "baits". Often the advice of a sports dealer on which type of lure works best locally will save the vacationer lugging out a case full of assorted spoons, plugs and spinners.

16-Year-Old Boy Sleeps On Tree Top

CLEVELAND, O.—For four years the long-suffering mother of Richard Granger has awakened her son each morning by throwing a rock at his morning tree-top perch where her "nature boy" offspring insists on sleeping because he "almost suffocated" in the house.

The 16-year-old high school freshman wants to be a fireman like his dad and grandfather and also dabbles in physical culture, his favorite subject in school.

Richard claims the distinction of never having had a cold during his several slumbers 15 feet above the ground in the front yard, tucked in his down-filled sleeping bag.

SELECTED SUMMER SAVING SPECIALS

Timely Buys in SUMMER SHOES

Locals

Mr. and Mrs. Robert Kasten of Edmonton have been renewing old acquaintances here last week.

Our old friend Albert Seneff is relief agent at the CN depot just now, while Mr. and Mrs. Targett are on a motor trip to the coast.

Born to Mr. and Mrs. L. Shaw at the Wainwright hospital June 28, a daughter.

Born to Mr. and Mrs. Alfred Halvorsen, at the Viking hospital June 28, a son.

Mrs. R. A. Larson spent a few days this week visiting Mr. and Mrs. George Sprig at Muriel Lake. She was accompanied by her brother and sister-in-law, Mr. and Mrs. Sigvald Strand, also Miss Barbara Strand, all of Brockton, Montana.

The Irma United Church Sunday School held its annual picnic at Hardisty Lake on July 5. As usual this was a very enjoyable outing. The goodly number of adults who always turn out really help to keep things going and make the S.S. picnic a congregational affair.

Mrs. D. H. Gunn and daughters have been enjoying a visit from Mrs. Gunn's aunt, Mrs. Frost of Sask. Mr. D. H. Gunn is at Summer School again this year.

The CGIT members have been camping at Hardisty Lake under the leadership of Mrs. Geo. Fisher. Gary Jones is taking in the Calgary Stampede this week.

Mr. and Mrs. Symington and family and Mrs. Zoost are away on a motor trip to the West Coast.

Mrs. Syd Pavely visited her daughter Josephine in the city last week.

Mr. and Mrs. Geo. Graham who were former residents here, have arrived from the U.S. to visit with Mr. and Mrs. H. Adams and other friends at Fabian and Irma.

Don't forget the blood donor clinic on July 20.

A donation to the Cancer Fund in memory of Isaac Lindquist was made by Mr. and Mrs. Harold Barker.

The rains really come to order this season.

Rev. H. W. Inglis, Mrs. Inglis and family are holidaying at a northern lake for the next two weeks. There will be no evening service at the United Church for the next two Sundays.

Mrs. Pond, Jeannette and Lorraine are leaving Irma this week to visit with friends and relatives at the coast.

FOR SALE—20 New Hampshires and 40 Leghorn yearling hens. Laying 65 per cent.—Mrs. R. L. Rohrer. 14p

LOST—in village of Irma, a ladies wrist watch. If found notify W. Crabb or Times Office. 14p

Harvesting Prelude

When you think of Harvest you naturally think of Combines, and when the sensible farmer thinks of Combines, he naturally thinks of "MASSEY-HARRIS."

Why do Massey-Harris Combines take the lead the world over; because they have proved themselves. During the Combine Cavalcade of recent years in the United States, American farmers waited for the Massey-Harris when they could have got other makes to harvest their crop. Last year the U.S. Government wanted to buy the whole output of Massey-Harris Self-Propelled Machines at a much higher price than the Canadian price, thus, the U.S. machine companies invaded Western Canada in order to find a market for their inferior combines. Some, of course, were sold, but we could mention quite a few names who would be glad to trade their machines for Massey-Harris.

We will tell you a few things next week about the Massey-Harris which you may not know. Call in and talk the matter over with your Massey-Harris Agent.
